

EMERGENCY PREPAREDNESS

1

ANIMALS IN DISASTERS

2

Preparing for Disasters

repare for a range of threats

Personal responsibility

Develop preparedness programs based on the community's needs, expertise, and resources

Level of Concern for Animals Close to 60% of all US households have pets.

- Some people are more concerned for their animals in disasters than they are for temselves
- Emergency management personnel must prioritize saving human lives, but animals cannot be viewed simply as inanimate property

4

5

Animal Issues in Disasters

- Traditional concerns involving household pets, service animals, and livestock during disasters include:
 - The spoilage of human food and water supply
 - Animal bites
 - Outbreaks of zooneses (diseases transmitted between animals and people) such as rabies

PETS EVACUATION AND TRANSPORTATION STANDARDS ACT **OF 2006 (PETS ACT)**

7

8

PETS Act?

During the Federal response to Hurricane Katrina, four critical flaws in national preparedness became evident:

- Processes for unified management of the national response

- Command and control structures within the federal government

- Knowledge of preparedness plans

- Regional planning and coordination

What Does the PETS Act Do?

Ensures State and local emergency preparedness operational plans address the needs of individuals with household pets and service animals following a major disaster

Authorizes FEMA to provide rescue, care, shelter, and essential needs for individuals with household pets and the pets themselves

10

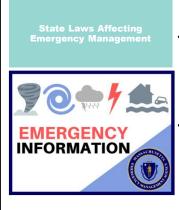

When is the PETS Act Operational?

- When a federal disaster declaration has been made by the President
- That declaration serves as a "trigger" that provides for reimbursement for allowable, documented services utilized in the emergency event

13

- Each State must have laws that are consistent with the Federal law if they wish to qualify for Federal aid and assistance
- MEMA's Animal Shelter Coordination Plan responds to this mandate

14

PURPOSE, SCOPE, POLICES & ASSUMPTIONS

The Animal Sheltering Coordination Plan

Purpose

 Plan provides guidance in coordinating and maximizing resources to support animal care, shelter, and reunification and implementing shelter operations in coordination with MEMA and local municipalities

16

The Animal Sheltering Coordination Plan

Scope

• The Plan does not supersede existing local or regional shelter plans

 Applicable to agencies and departments in the Commonwealth, federal agencies, and support organizations with a role in supporting activities related to animal sheltering

17

The Animal Sheltering Coordination Plan

Policies

- The Massachusetts Department of Agricultural Resources (MDAR) will serve as state lead for animal sheltering and coordination
- Emergency shelters must make exceptions to "no pets" policies for service animals.

The Animal Sheltering Coordination Plan

Assumptions

- Animal sheltering is the primary responsibility of owners
- Municipalities must make reasonable modifications to human shelter policies for service animals
- ACOs will coordinate with their local emergency management directors to identify facilities

19

SHELTER STRATEGY AND TYPES OF SHELTERS

20

Local Initiated Single Community

• Municipality provides emergency animal sheltering services for a single community

Local to Local Mutual Aid Several municipalities come together to provide emergency animal sheltering through an existing mutual aid agreement

22

Examples of Local Support

EMA

Animal Control MOU

DART/CART/SART

Medical Reserve Corps

CERT

American Red Cross

State Initiated Regional Animal Shelter

- Large-scale animal shelters serving multiple municipalities
- Activated by MEMA and coordinated by MDAR
- Conditions that may trigger State Initiated Regional Animal Shelter:

 - Local municipalities exceed sheltering capabilities

 - To maximize use of resources
 Affected municipalities unable to provide sheltering because of direct impact

25

GROUP DISCUSSION

26

ROLES & RESPONSIBILITIES OF MUNICIPALITIES & ACOS

Local Preparedness is Best

- Incidents typically begin and end locally
- People with local expertise can identify common hazards
- Local decision makers understand the community's priorities for recovery

28

	Number and locations of animals in your community	Veterinary providers
What to		
Know About Your Community	Pet stores	Boarding facilities
Community		
	Animal-friendly hotels	Animal welfare organizations

Local emergency management directors and ACOs work together to:		Identify planning assumptions, capabilities, and needs of the municipality
Develop plans and procedures	Coordinate, collaborate, train, and exercise with animal shelter partners	Identify appropriate facilities and establish agreements with facility owners
Assess numbers of individuals who may require animal shelter services	Activate services when needed	Coordinate transport of animals

Local Municipality Responsibilities

- ACOs are responsible for implementation and direction of these activities and will provide situation reports to emergency management director
- Emergency management director provides situation reports to MEMA Regional Emergency Operations Center

31

Developing a Plan

Start by forming a committee co-chaired by emergency management personnel and the ACO

Develop a local emergency operations plan (EOP) Use existing organizational structures
 Meet crises at the lowest possible level of government
 Include voluntary and private sector resources

32

Your EOP: Where to Start

The purpose of the plan is to provide a systematic way of responding to an emergency situation

- The plan should be flexible, multi-use, detailed, consistent, and comprehensive
- Establish effective communications up front
- Develop the plan incrementally
- Test your plan

Characteristics of a Good Plan

- Based on facts or valid assumptions
- Includes a community resource inventory
- Uses clear, simple language
- Coordinates department plans within the jurisdiction with the overall emergency management plan through annexes
- Avoids duplication and conflicts in tasks

34

It is often very hard to plan for a disaster, but it is even harder to explain why you did not.

40

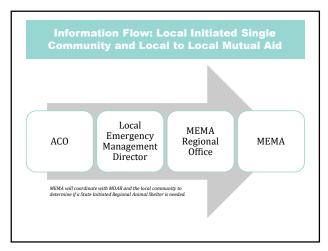

COMMUNICATION, SITUATIONAL AWARENESS & INFORMATION FLOW

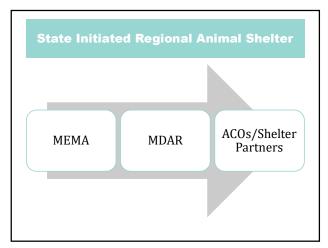

41

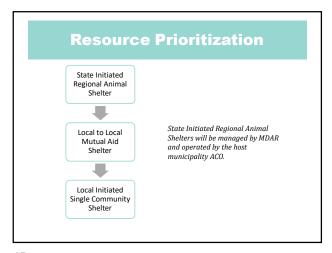

Communication & Situational Awareness

- Maintaining good situational awareness and establishing a common operational picture is critical for MEMA, other emergency organizations, and for local municipalities
- Municipal ACO will implement and direct activities in their jurisdiction and report on status of response activities to the Emergency Management Director

ACOs, animal inspectors, and EMDs should connect to plan strategically MDAR (617) 626-1795 MEMA (508) 820-2000 Environmental Police (617) 626-1665
